

Peach by the Gram is a Scented Marijuana Neutralizer that uses natural scent molecules from ripening peaches that are attracted to the molecules that give marijuana that skunky weed smell.

How it works? Peaches, as they ripen, release marijuana odor neutralizing scent molecules that are attracted to the radical sulfur-hydrogen atom of Prenylthiol, which is the molecule responsible for the skunky odor of marijuana. These molecules then combine into a more pleasant scent. Without the marijuana smell present, Peach By The Gram smells like a fresh unripe peach. Once it combines with the marijuana smell, it neutralizes into the smell of very ripe peaches.

Top Notes: Tart Lemon, Candied Orange
Middle Notes: Peach, Apricot
Base Notes: Sweet Cream, Vanilla

Canna-Less - Marijuana Abatement Fragrances
Our certified marijuana abatement fragrances contain natural scent molecules that are attracted to the radical sulfur hydrogen compound found at the end of the Prenylthiol molecule. You can tell it works, because it actually changes the way the fragrance smells rather than just covering up marijuana scent with a more powerful smell.
