

Reefresh

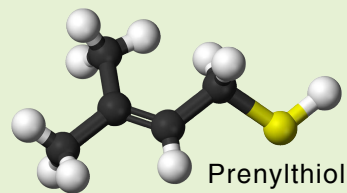

Reefresh is a Scented Marijuana Neutralizer that uses natural scent molecules from citrus blooms that are attracted to the molecules that give marijuana that skunky weed smell.

How it works? As blooms transform into citrus fruit, they release marijuana odor neutralizing scent molecules that are attracted to the radical sulfur-hydrogen atom of Prenylthiol, which is the molecule responsible for the skunky odor of marijuana. These molecules then combine into a more pleasant scent. Without the marijuana smell present, Reefresh smells like zesty unripe citrus with a very light floral background. Once it combines with the marijuana smell, it neutralizes into a more robust floral with ripe citrus background.

Top Notes: Orange Blossom, Mint Leaf, Lemon Verbena
Middle Notes: Jasmine Petals, Fresh Herbs
Base Notes: Blue Violet, Cedarwood

Canna-Less - Marijuana Abatement Fragrances
Our certified marijuana abatement fragrances contain natural scent molecules that are attracted to the radical sulfur hydrogen compound found at the end of the Prenylthiol molecule. You can tell it works, because it actually changes the way the fragrance smells rather than just covering up marijuana scent with a more powerful smell.
